

DMtech GW01W-L / GW01D-L

LoRa gateway compatible with all DMtech LoRa-capable sensors. Designed for network independent deployments in industrial and facility management applications.

- Operating temperature -20 to 70 °C, relative humidity 0 to 95% (non-condensing)
- Powered via micro-USB connector
- Integrated USB-UART converter for monitoring and firmware upgrade
- RS485 interface with ModBus client functionality
- Optional WiFi interface with HTTP(s) REST and MQTT (over TLS) support
- Optional WiFi Access Point configuration mode with embedded web server
- Optional NB-IoT/LTE-M1 interface for communication with IoT cloud services
- Equipped with Bluetooth LE interface (e.g. for implementing indoor localization solution)
- Industry-grade aluminium housing
- Wall-mount (GW01W-L) and desktop option (GW01D-L) available
